SUMMARY

Full-Stack Software Developer with 3+ years of commercial experience developing and maintaining web applications, internal business systems and client-facing platforms. Experienced with JavaScript, React, Node.js, Express, PostgreSQL, REST APIs and third-party integrations. Delivered features across the frontend and backend, investigated production issues and supported existing applications. Seeking a full-time software development role.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Next.js, Express, HTML5/CSS3, SCSS
- **Databases & Backend:** PostgreSQL, MongoDB, REST APIs, Webhooks, Node.js
- **Tools & Integrations:** Git, Stripe API, OpenAI API, GoHighLevel, Zapier, Postman, Insomnia
- **CMS & Web Development:** WordPress, Custom Themes, Breakdance Builder, Web Hosting & DNS

PROFESSIONAL EXPERIENCE

Software Developer | Paul McFadden Wealth
Jan 2025 – Aug 2026 | Cambuslang

- Developed, updated and maintained customer-facing websites across multiple client accounts, handling implementation, deployment, technical support and client requests.
- Built features for an event and ticketing management system, integrating a WordPress frontend with a Node.js backend and PostgreSQL database through APIs and webhooks.
- Integrated event and attendee workflows with Zapier and GoHighLevel CRM to reduce reliance on manual hand-offs between systems.
- Developed an internal inventory-tracking application to record and manage company assets and stock.
- Investigated defects, maintained live websites and implemented enhancements to meet business requirements and deadlines.

Junior Software Developer | Nitro Solutions
Jul 2023 – Dec 2024 | Paisley

- Developed and maintained full-stack business applications using React, JavaScript, Node.js, SCSS and PostgreSQL.
- Implemented functionality for stock management, HR portals and daily till-drop reporting used in operational workflows.
- Developed a self-service food-ordering kiosk that transmitted customer orders to kitchen display systems in real time.
- Diagnosed bugs, improved existing features and maintained technical documentation to support ongoing application development.

SELECTED SOFTWARE PROJECTS

Event & Ticketing Management System
React, JavaScript, Node.js, PostgreSQL, WordPress, Stripe, webhooks

- Worked on an end-to-end event platform with a React administration dashboard, attendee management, digital check-in and automated communications. Integrated a WordPress registration frontend with backend APIs, payment processing and a PostgreSQL database.

Lead Generation & Website Audit Tool
React, JavaScript, MUI, SCSS, Axios, Node.js, Google Places API, OpenAI API

- Built a business lead-search and website-audit application with a lead dashboard, AI-assisted sales-pitch generation and English/Spanish interface.

PRIOR PROFESSIONAL EXPERIENCE

Debt Management Executive Officer (Team Leader) | HMRC
Jan 2019 – Oct 2021 | Glasgow

- Led and supported a team of Debt Resolution advisers, monitoring performance, providing coaching and ensuring quality standards were maintained.
- Identified and resolved operational issues, supported process improvements and coordinated team communications during management absences and organisational change.
- Delivered training and guidance to colleagues, helping maintain consistent working practices and service standards.

Debt Resolution Assistant Officer | HMRC
Sept 2017 – Jan 2019 | Glasgow

- Managed customer payment arrangements, resolving complex enquiries through effective communication, problem-solving and attention to detail.
- Supported the onboarding and mentoring of new advisers, sharing knowledge of internal systems, procedures and compliance requirements.

Customer Service & Retail Assistant | Tesco
2008 – 2017 | Glasgow

- Developed strong communication, teamwork and organisational skills while supporting daily store operations, stock management and customer service.

EDUCATION

CodeClan | Professional Software Development Award (SQA Level 8)
Jan 2023 – Apr 2023

- Intensive, 800+ hour immersive software engineering program focused on OOP, full-stack architecture, clean code principles, Test-Driven Development (TDD), and Agile/Scrum methodologies using Python, JavaScript, React, and SQL.

IT Career Switch | Full Stack Web Development Certification
Nov 2021 – Dec 2022

- Completed comprehensive coursework covering full-stack web fundamentals, responsive frontend design, server-side programming, and database management (HTML5, CSS3, JavaScript ES6+, and SQL).

University of Strathclyde / Glasgow Kelvin College | HNC Chemical & Applied Sciences
Aug 2013 – Aug 2016

- Awarded the Aker Solutions Award for academic excellence. Developed strong analytical problem-solving, quantitative reasoning, and experimental documentation skills.
